

GLOBAL HIGH YIELD BOND FUND

Class A2 HCHF ISIN: LU2214901261
Fund Currency: USD Share Class Currency: CHF

Janus Henderson
INVESTORS

A sub-fund of Janus Henderson Horizon Fund, a Luxembourg SICAV managed by Henderson Management S.A.

Objective and investment policy

Objective

The Fund aims to provide an income with the potential for capital growth over the long term.

Performance target: To outperform the ICE BofAML Global High Yield Constrained Index (100% Hedged) by 1.75% per annum, before the deduction of charges, over any 5 year period.

Investment policy

The Fund invests at least 80% of its assets in high yield (non-investment grade, equivalent to BB+ rated or lower) corporate bonds, in any country. The Fund may invest up to 20% of its net assets in contingent convertible bonds (CoCos); and/or asset-backed and mortgage-backed securities.

The Fund may also invest in other assets including bonds of other types from any issuer (including perpetual bonds), cash and money market instruments.

The investment manager may use derivatives (complex financial instruments), including total return swaps, with the aim of making investment gains in line with the Fund's objective, to reduce risk or to manage the Fund more efficiently.

The Fund is actively managed with reference to the ICE BofAML Global High Yield Constrained Index (100% Hedged), which is broadly representative of the bonds in which it may invest, as this forms the basis of the Fund's performance target. The investment manager has

discretion to choose investments for the Fund with weightings different to the index or not in the index, but at times the Fund may hold investments similar to the index.

Strategy

The investment manager seeks to provide a high overall yield and potential for capital growth by investing primarily in sub investment grade rated corporate bonds across global high yield markets. The investment process combines rigorous fundamentally driven security selection from the credit analysts, which is expected to be the largest driver of performance, with asset allocation views at the Fund and regional levels.

Distribution policy This share class accumulates income which is retained within the price of the share class.

Recommendation This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

You can buy, sell or switch shares in the Fund on any dealing day, as defined in the Company's Prospectus.

For an explanation of some of the terms used in this document, please visit the glossary on our website at www.janushenderson.com.

Risk and reward profile

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The risk/reward rating above is based on medium-term volatility. In the future, the Fund's actual volatility could be higher or lower and its rated risk/reward level could change.

The share class appears at 4 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in net asset value in the past 5 years than those in lower categories. The lowest category does not mean risk free.

Historical data, such as is used in calculating the SRRI, may not be a reliable indication of the future risk profile of the Fund.

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events. Under normal market conditions the following risks may apply:

Credit Risk An issuer of a bond (or money market instrument) may become unable or unwilling to pay interest or repay capital to the Fund. If this happens or the market perceives this may happen, the value of the bond will fall.

Interest Rates When interest rates rise (or fall), the prices of different securities will be affected differently. In particular, bond values generally fall when interest rates rise. This risk is generally greater the longer the maturity of a bond investment.

High Yield Bonds The Fund invests in high yield (non-investment grade) bonds and while these generally offer higher rates of interest than investment grade bonds, they are more speculative and more sensitive to adverse changes in market conditions.

Prepayment and Extension Some bonds (callable bonds) allow their issuers the right to repay capital early or to extend the maturity. Issuers may exercise these rights when favourable to them and as a result the value of the Fund may be impacted.

Contingent Convertible Bonds (CoCos) CoCos can fall sharply in value if the financial strength of an issuer weakens and a predetermined trigger event causes the bonds to be converted into shares of the issuer or to be partly or wholly written off.

Derivatives The Fund may use derivatives with the aim of reducing risk or managing the portfolio more efficiently. However this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Exchange Rates If the Fund holds assets in currencies other than the base currency of the Fund or you invest in a share/ unit class of a different currency to the Fund (unless 'hedged'), the value of your investment may be impacted by changes in exchange rates.

Currency Hedging When the Fund, or a hedged share/unit class, seeks to mitigate exchange rate movements of a currency relative to the base currency, the hedging strategy itself may create a positive or negative impact to the value of the Fund due to differences in short-term interest rates between the currencies.

Liquidity Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

Transaction Costs (higher charges) The Fund may incur a higher level of transaction costs as a result of investing in less actively traded or less developed markets compared to a fund that invests in more active/developed markets.

Counterparty Risk and Operational Risk The Fund could lose money if a counterparty with which the Fund trades becomes unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

For more information please see the Company's Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

One-off charges taken before or after you invest*

Entry Charge	5.00%
--------------	-------

Exit Charge	0.00%**
-------------	---------

* The charges shown are maximum figures. In some cases you may pay less.

** Subject to a charge of up to 1.00% where the Manager suspects excessive trading by an investor (and specifically on subscriptions held for less than 90 days).

Past performance

Charges taken from the Fund over a year

Ongoing Charges	1.19%
-----------------	-------

The ongoing charge figure is estimated because the share class has insufficient track record for us to calculate it exactly.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another fund.

For more information please see the Company's Prospectus.

The past performance is calculated in CHF.

The Fund was launched in November 2013 and the share class was launched in September 2020.

Insufficient data is available to provide past performance figures. Past performance is not a guide to future performance.

The Fund does not aim to track the performance of the index.

Practical information

Depository: BNP Paribas Securities Services, Luxembourg Branch

To obtain more information: This Key Investor Information Document may not contain all the information you need.

For the last published price of shares in the Fund or any additional information on the Fund, or to obtain the Company's prospectus or the annual/semi-annual report, please visit www.janushenderson.com. Documents are available free of charge in English and certain other languages.
