KEY INVESTOR INFORMATION
This document provides you with Key Investor Information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Janus Henderson INVESTORS

Janus Henderson Fund

Global Multi-Strategy Fund Class H2 HGBP ISIN: LU2541417809

A sub-fund of Janus Henderson Fund, a Luxembourg SICAV managed by Janus Henderson Investors Europe S.A.
Fund Currency: EUR Share Class Currency: GBP

Objective and investment policy

Objective

The Fund aims to provide a positive (absolute) return, regardless of market conditions, over any 12 month period. A positive return is not guaranteed over this or any other time period and, particularly over the shorter term, the Fund may experience periods of negative returns. Consequently, your capital is at risk.

Performance target: To outperform the Euro Short Term Rate by 7% per annum, before the deduction of charges, over any 3 year period.

Investment policy

The Fund invests in a global portfolio of assets including shares of companies, investment grade and non-investment grade bonds issued by governments and companies (including convertible bonds, contingent convertible bonds and distressed securities), currencies, and makes extensive use of derivatives (complex financial instruments), including total return swaps, to take both 'long' and 'short' positions in companies and bonds that the Investment Manager believes will either rise in value (long positions) or fall in value (short positions) meaning that the Fund may benefit from either scenario. The Fund may invest up to 20% of its net assets in contingent convertible bonds. The Fund may invest up to 10% of its net assets in special purpose acquisition companies and 10% in distressed debt securities.

The Fund will hold a substantial proportion of its assets in cash and money market instruments as a result of holding derivatives or for asset allocation purposes. The Fund may also take long or short exposures to other asset classes such as commodities and may hold other funds (such as collective investment schemes and exchange traded funds). Allocations across asset classes will be made at the Investment Manager's discretion and the Fund need not be invested in all asset classes at any one time. It follows an unconstrained investment approach, with no regional or sector constraints.

The Fund is actively managed and makes reference to the Euro Short Term Rate, as this forms the basis of the Fund's performance target and the level above which performance fees may be charged (if applicable). For currency hedged share classes, the rate that corresponds with the relevant share class currency is used as the basis of the performance comparison and for calculating performance fees. The Investment Manager has complete discretion to choose investments for the Fund and is not constrained by a benchmark.

Strategy

The Investment Manager adopts a multi-strategy approach, utilising a diverse range of investment styles, techniques, assets, company sizes, time horizons and markets with the aim of providing a positive return. Long positions may be held through a combination of direct investment and/or derivative instruments, whilst the short positions are achieved entirely through derivative instruments. The use of derivatives is extensive and forms an important part of the investment strategy.

Transaction costs In addition to the charges set out in the Charges section below, the Fund involves a high level of buying and selling activity and will incur higher portfolio transaction costs which are paid from the assets of the Fund. These may have a material impact on your returns.

Distribution policy This share class accumulates income which is retained within the price of the share class.

Recommendation This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

You are about to purchase a product that is not simple and may be difficult to understand.

Investors should seek independent advice and satisfy themselves that they have an informed understanding of the strategies and techniques employed by the Investment Manager.

The Fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

You can buy, sell or switch shares in the Fund on any dealing day, as defined in the Company's Prospectus.

For an explanation of some of the terms used in this document, please visit the glossary on our website at www.janushenderson.com.

Risk and reward profile

Potentially lower reward						Potentially higher reward
Lower risk						Higher risk
1	2	3	**4**	5	6	7

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The rating above is based on simulated historic volatility. Historic data may not be a reliable indication of the future risk profile of the Fund. The rating is not guaranteed and may change over time.

The share class appears at 4 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in Net Asset Value in the past five years than those in lower categories. The lowest category does not mean risk free.

Other material risks not captured by the rating:

Equities Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.

Credit Risk and High Yield Bonds An issuer of a bond (or money market instrument) may become unable or unwilling to pay interest or repay capital. If this happens or the market perceives this may happen, the value of the bond will fall. High yielding (non-investment grade) bonds are more speculative and more sensitive to adverse changes in market conditions.

Interest Rates When interest rates rise (or fall), the prices of different securities will be affected differently. In particular, bond values generally fall when interest rates rise (or are expected to rise). This risk is typically greater the longer the maturity of a bond investment.

Contingent Convertible Bonds (CoCos) CoCos can fall sharply in value if the financial strength of an issuer weakens and a predetermined trigger event causes the bonds to be converted into shares/units of the issuer or to be partly or wholly written off.

Special Purpose Acquisition Companies (SPACs) SPACs are shell companies set up to acquire businesses. They are complex and often lack the transparency of established companies, and therefore present greater risks to investors.

Derivatives and Leverage Derivatives may be used to help achieve the investment objective. This can result in leverage (higher levels of debt), which can magnify an investment outcome. Gains or losses may therefore be greater than the cost of the derivative. Derivatives also introduce other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Exchange Rates If the Fund holds assets in currencies other than the base currency of the Fund, or you invest in a share/unit class of a different currency to the Fund (unless hedged, i.e. seeks to mitigate exchange rate movements between the share/unit class currency and the base currency of the Fund), the value of your investment may be impacted by changes in exchange rates.

Currency Hedging When the Fund, or a share/unit class, seeks to mitigate exchange rate movements of a currency relative to the base currency (hedge), the hedging strategy itself may positively or negatively impact the value of the Fund due to differences in short-term interest rates between the currencies.

Liquidity Securities could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

Commodities The Fund's exposure to commodities may be subject to rapid and substantial price movements resulting in high volatility. Developments affecting commodities instruments, such as changes in supply and demand, government programs and policies, political events and changes in interest rates may have an impact on the Fund.

Counterparty Risk and Operational Risk Losses could be incurred if a counterparty became unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

For more information please see the Company's Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

One-off charges taken before or after you invest*

Entry Charge	5.00%
Exit Charge	0.00%

* The charges shown are maximum figures. In some cases you may pay less.

Charges taken from the Fund over a year

Ongoing Charges	1.18%

The ongoing charges are based on actual annualised expenses for the period ending 30 September 2025. Ongoing charges may vary from year to year.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another Fund.

Charges taken from the Fund under certain specific conditions

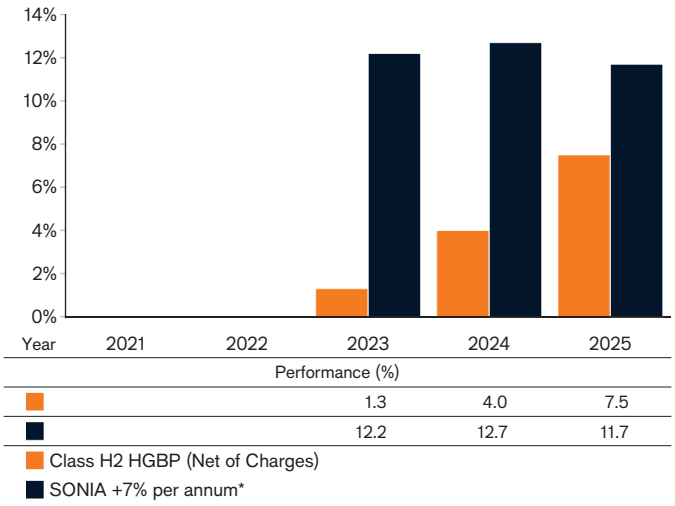

Performance fee	20.00%*

*20% of any returns that, subject to a High Water Mark, the Fund achieves above the Sterling Overnight Index Average (SONIA). The actual amount charged in the Fund's last financial period ending 30 September 2025 amounted to 0.00%.

Performance fees may be charged before the Fund's outperformance target is reached.

For more information about Charges please see the Company's Prospectus.

Past performance

*Warning: From 30 April 2025, the Fund's benchmark changed from Euro Main Refinancing Rate to Euro Short Term Rate. The share class benchmark changed from Bank of England Base Rate to Sterling Overnight Index Average. Past performance before 30 April 2025 is shown for the previous share class benchmark.

The past performance is calculated in GBP.

The Fund was launched in June 2020 and the share class was launched in October 2022.

Past performance does not predict future returns.

The past performance takes into account all charges except one-off charges.

Please note that while the Fund aims to achieve its performance target before the deduction of charges, the chart and table illustrate the actual performance of the share class after the deduction of charges.

The Fund does not aim to track the performance of the benchmark.

Practical information

Depositary: BNP Paribas, Luxembourg Branch

To obtain more information: This Key Investor Information Document may not contain all the information you need.

For the last published price of shares in the Fund or any additional information on the Fund, or to obtain the Company's prospectus or the annual/semi-annual report, please visit www.janushenderson.com.
