What is this product?

Type

Janus Henderson Horizon Emerging Markets Debt Hard Currency Fund is a sub-fund of Janus Henderson Horizon Fund, an open-ended investment company organised under the laws of the Grand Duchy of Luxembourg. Janus Henderson Horizon Fund qualifies as an undertaking for collective investment in transferable securities (UCITS).

Term

This investment has no maturity date. The Manufacturer has the right to terminate the product in a limited number of circumstances, as set out in the Prospectus.

Objectives

The Fund aims to provide a return, from a combination of income and capital growth over the long term. Performance target: To outperform the JP Morgan EMBI Global Diversified Index by 1.25% per annum, before the deduction of charges, over any 5-year period. The Fund invests at least 70% of its assets in bonds, including high yield (non-investment grade) bonds in emerging markets and other debt securities denominated in hard currencies (e.g. USD, EUR, GBP). The Fund may invest up to 30% in emerging market corporate bonds; 10% in distressed debt, 10% in contingent convertible bonds (CoCos), 10% in asset-backed and mortgage-backed securities and 10% in unrated securities. Where investments are made in assets in currencies other than the base currency of the Fund, the Fund will seek to hedge those assets back to the base currency to remove the risk of currency exchange rate movements, although it may also be exposed through investments or cash to other currencies. The Fund may invest in other assets including bonds of other types (including perpetual bonds), cash and money market instruments. The Investment Manager may use derivatives (complex financial instruments) including interest rate futures, bond futures, options, swaps (including total return swaps (up to 20%), interest rate swaps, credit default swaps) and forwards, with the aim of making investment gains or to manage the Fund more efficiently. The Fund is actively managed with reference to the JP Morgan EMBI Global Diversified Index, which is broadly representative of the bonds in which it may invest, as this forms the basis of the Fund's performance target. The Investment Manager has discretion to choose investments for the Fund with weightings different to the index or not in the index, however the geographical scope of the Fund may have the effect of limiting the extent to which the Fund will deviate from the index. The Investment Manager will seek to promote environmental, social and/or governance (ESG) principles in managing the Fund, which may include the exclusion of issuers that the Investment Manager considers could contribute to significant ESG harm, as further described in the prospectus. The Fund promotes environmental and/or social characteristics as defined under Article 8 of the Sustainable Finance Disclosure Regulation (SFDR). This share class accumulates income which is retained within the price of the share class. You can buy, sell or switch shares in the Fund on any dealing day, as defined in the Fund's Prospectus. The Fund's Depositary is BNP Paribas, Luxembourg Branch.

Intended Retail Investor

Investors who understand the Fund's risks, seek a combination of capital and income return in excess of an emerging market bond index by investing in emerging market bonds (including corporate bonds and other fixed and floating rate securities), and intend to invest their money for at least five years. The Fund is designed to be a component in a diversified investment portfolio, and is not designed for investors who are unable to accept more than a minimal loss of their investment.

What are the risks and what could I get in return?

Risk Indicator

Lower Risk 1 2 **3** 4 5 6 7 Higher Risk

The risk indicator assumes that you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity of the PRIIPs manufacturer to pay you.

If the product currency differs from your home currency, the following applies: Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Details of all relevant risks can be found in the Fund's prospectus, available at www.janushenderson.com

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: 5 years

Example Investment: EUR 10,000

Scenarios		If you exit after 1 year	If you exit after 5 years
Minimum	**There is no minimum guaranteed return. You could lose some or all of your investment.**		
Stress	**What you might get back after costs**	6,480 EUR	6,320 EUR
	Average return each year	-35.20%	-8.77%
Unfavourable	**What you might get back after costs**	7,030 EUR	7,420 EUR
	Average return each year	-29.72%	-5.78%
Moderate	**What you might get back after costs**	9,830 EUR	8,910 EUR

Favourable	**What you might get back after costs**	11,160 EUR	11,960 EUR
	Average return each year	11.55%	3.65%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment in the benchmark between October 2017 and October 2022.

The moderate scenario occurred for an investment in the benchmark between November 2018 and November 2023.

The favourable scenario occurred for an investment in the benchmark between December 2015 and December 2020.

What happens if Janus Henderson Investors Europe S.A. is unable to pay out?

You may face a financial loss should the Manufacturer or Depositary, BNP Paribas, Luxembourg Branch, default on their obligations. There is no compensation or guarantee scheme in place which may offset, all or any of, this loss.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.
We have assumed:
- In the first year, you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	585 EUR	873 EUR
Annual cost impact (*)	5.8%	1.8% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be -0.4% before costs and -2.3% after costs.
