What is this product?

Type

Janus Henderson Dynamic Trend Fund is a sub-fund of Janus Henderson Fund, an open-ended investment company organised under the laws of the Grand Duchy of Luxembourg. Janus Henderson Fund qualifies as an undertaking for collective investment in transferable securities (UCITS).

Term

This investment has no maturity date. The Manufacturer has the right to terminate the product in a limited number of circumstances, as set out in the Prospectus.

Objectives

The Fund aims to generate positive (absolute) returns, regardless of market conditions, over any 3-year period. A positive return is not guaranteed over this or any time period and, particularly over the shorter term, the Fund may experience periods of negative returns. Consequently, your capital is at risk. Performance Target: To outperform the Secured Overnight Financing Rate by at least 4% per annum, before the deduction of charges, over any 3-year period. The Fund invests in a global, diversified portfolio of derivatives (complex financial instruments), including index futures, interest rate futures, short-term interest rate futures, equity futures, bond futures, currency futures, swaps (such as index credit default swaps, interest rate swaps and total return swaps) contracts for difference, options and forwards. The use of derivatives is extensive. Exchange traded futures and total return swaps are core to the investment strategy and used on a predominant basis. Other derivatives may be used on an ancillary basis and as market conditions dictate. The Fund may also gain exposure to fixed income (debt) instruments such as investment grade government bonds and investment grade or high yield corporate credit indices accessed through derivatives. There is no limit on the debt securities or government securities rated below investment grade, but any such exposure is expected to be small. The Fund may also gain indirect exposure to commodities using eligible Transferable Securities (such as structured notes) and/or derivatives whose underlying assets consist of commodity indices. Allocations across asset classes will be made at the Investment Manager's discretion and the Fund need not be invested in all asset classes at any one time. It follows an unconstrained investment approach, with no regional or sector constraints. The Fund will hold a substantial proportion of its assets in cash, bank deposits and money market instruments as a result of holding derivatives or for asset allocation purposes. The Fund is actively managed and makes reference to the Secured Overnight Financing Rate, as this forms the basis of the Fund's Performance Target and the level above which performance fees may be charged (if applicable). The Investment Manager has complete discretion to choose investments for the Fund and is not constrained by a benchmark. This share class accumulates income which is retained within the price of the share class. You can buy, sell or switch shares in the Fund on any dealing day, as defined in the Fund's Prospectus. The Fund's Depositary is BNP Paribas, Luxembourg Branch.

Intended Retail Investor

A typical investor will invest into this Fund to seek an absolute return through global futures markets with a low correlation to traditional asset classes. Investors should ensure they have an informed understanding of the strategies and techniques employed by the Investment Manager, the risks of the Fund and that the synthetic risk indicator of the Fund is compatible with their own risk tolerance. Investors with basic investment knowledge must receive advice before investing; only investors possessing the experience, knowledge and expertise to properly assess the risks that an investment in the Fund incurs will be able to invest in the Fund. Investors in the Fund should plan to invest their money for at least 5 years.

What are the risks and what could I get in return?

Risk Indicator

Lower Risk 1 2 **3** 4 5 6 7 Higher Risk

The risk indicator assumes that you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity of the PRIIPs manufacturer to pay you.

If the product currency differs from your home currency, the following applies: Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market

performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Details of all relevant risks can be found in the Fund's prospectus, available at www.janushenderson.com

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: 5 years

Example Investment: USD 10,000

Scenarios		If you exit after 1 year	If you exit after 5 years
Minimum	**There is no minimum guaranteed return. You could lose some or all of your investment.**		
Stress	**What you might get back after costs**	6,200 USD	5,700 USD
	Average return each year	-38.01%	-10.65%
Unfavourable	**What you might get back after costs**	7,890 USD	8,380 USD
	Average return each year	-21.11%	-3.48%
Moderate	**What you might get back after costs**	9,490 USD	9,700 USD
	Average return each year	-5.14%	-0.61%
Favourable	**What you might get back after costs**	11,270 USD	10,600 USD
	Average return each year	12.71%	1.18%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment in the benchmark between January 2018 and January 2023.

The moderate scenario occurred for an investment in the benchmark between July 2019 and July 2024.

The favourable scenario occurred for an investment in the benchmark between May 2016 and May 2021.

What happens if Janus Henderson Investors Europe S.A. is unable to pay out?

You may face a financial loss should the Manufacturer or Depositary, BNP Paribas, Luxembourg Branch, default on their obligations. There is no compensation or guarantee scheme in place which may offset, all or any of, this loss.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.
We have assumed:
- In the first year, you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- USD 10,000 is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	635 USD	1,219 USD
Annual cost impact (*)	6.3%	2.4% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 1.8% before costs and -0.6% after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	5.00% is the maximum amount you pay when entering this investment and you could pay less. If you invest through a third-party the person selling you the product will inform you of the actual charge.	Up to 500 USD
Exit costs	We do not charge an exit fee for this Fund, but the person selling you the product may do so.	0 USD
Ongoing costs [taken each year]		
Management fees and other administrative or operating costs	1.28% is the estimated cost of managing, administering and operating the Fund.	128 USD
Transaction costs	0.07% is an estimate of the costs incurred when we buy and sell the underlying investments for the Fund. The actual amount will vary depending on how much we buy and sell.	7 USD
Incidental costs taken under specific conditions		
Performance fees	This is the impact of the performance fee. From your investment we take 10% of any returns that, subject to a High Water Mark, the Fund achieves above the Secured Overnight Financing Rate.	0 USD
