Janus Henderson Horizon Fund

Discovering New Alpha Fund Class H2 HGBP ISIN: LU3154198678

A sub-fund of Janus Henderson Horizon Fund, a Luxembourg SICAV managed by Janus Henderson Investors Europe S.A.

Fund Currency: USD Share Class Currency: GBP

Objective and investment policy

Objective

The Fund aims to provide capital growth over the long term.

Performance target: To outperform the MSCI ACWI Index, after the deduction of charges, over any 5-year period.

Investment policy

The Fund invests at least 80% of its net assets in equities or equity-related instruments of companies worldwide, including up to 20% of its net assets in emerging markets, whose products and services are considered by the Investment Manager to contribute positively to addressing global challenges including population growth, ageing population, resource constraints and climate change.

The Fund may invest in companies of any size, in any country and in any industry, but may have a bias towards smaller capitalisation companies. The Fund may invest up to 20% of its net assets in depositary receipts (including American Depositary Receipts and Global Depositary Receipts) and Real Estate Investment Trusts (REITs). The Fund may invest up to 20% of its assets in China A-Shares. The Fund may also invest in other assets including investment grade government bonds, associated derivative instruments, cash and money market instruments.

The Investment Manager may use derivatives (complex financial instruments) to reduce risk or to manage the Fund more efficiently.

The Fund is actively managed with reference to the MSCI ACWI Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the Fund's Performance Target. The Investment Manager has discretion to choose investments for the Fund with weightings different to the index or not in the index, but at times the Fund may hold investments similar to the index.

Strategy

The Investment Manager, through a thematic framework of stock selection, seeks to construct a global portfolio of companies that are considered to benefit from structural changes in the global economy through positively addressing global challenges, with the potential to drive superior long term capital growth. The global challenges identified by the Investment Manager include but may not be limited to the following examples: population growth, ageing population, resource constraints and climate change. The Investment Manager will optimise portfolio construction to minimise geographic, sector and style biases versus the benchmark in order to focus on stock selection as the primary driver of superior returns. While the Fund will invest in companies of any size, given the investment approach to identify future, long term high growth companies, the Fund may have a bias towards smaller capitalisation companies.

Distribution policy This share class accumulates income which is retained within the price of the share class.

Recommendation This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

You can buy, sell or switch shares in the Fund on any dealing day, as defined in the Company's Prospectus.

Risk and reward profile

Potentially lower reward						Potentially higher reward
Lower risk						Higher risk
1	2	3	4	5	**6**	7

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The rating above is based on simulated historic volatility. Historic data may not be a reliable indication of the future risk profile of the Fund. The rating is not guaranteed and may change over time.

The share class appears at 6 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in Net Asset Value in the past five years than those in lower categories. The lowest category does not mean risk free.

Other material risks not captured by the rating:

Equities Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.

Smaller Companies Shares of small and mid-size companies can be more volatile than shares of larger companies, and at times it may be difficult to value or to sell shares at desired times and prices, increasing the risk of losses.

Derivatives Derivatives may be used with the aim of reducing risk or managing the portfolio more efficiently. However, this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Exchange Rates If the Fund holds assets in currencies other than the base currency of the Fund, or you invest in a share/unit class of a different currency to the Fund (unless hedged, i.e. seeks to mitigate exchange rate movements between the share/unit class currency and the base currency of the Fund), the value of your investment may be impacted by changes in exchange rates.

Currency Hedging When the Fund, or a share/unit class, seeks to mitigate exchange rate movements of a currency relative to the base currency (hedge), the hedging strategy itself may positively or negatively impact the value of the Fund due to differences in short-term interest rates between the currencies.

Liquidity Securities could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

Counterparty Risk and Operational Risk Losses could be incurred if a counterparty became unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

For more information please see the Company's Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

One-off charges taken before or after you invest*

Entry Charge	5.00%
Exit Charge	None**

* The charges shown are maximum figures. In some cases you may pay less.

** Subject to a charge of up to 1.00% where the Manager suspects excessive trading by an investor (and specifically on subscriptions held for less than 90 days).

Charges taken from the Fund over a year

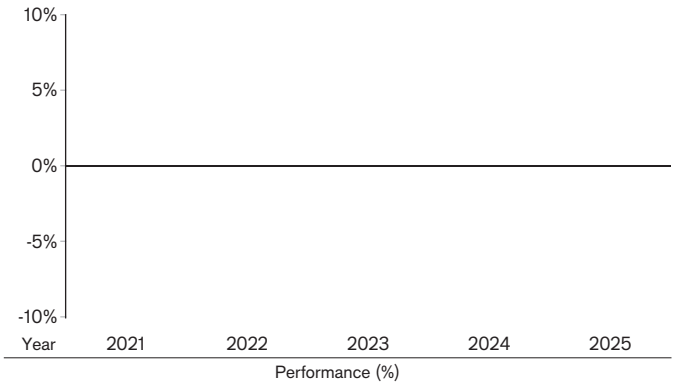

Ongoing Charges	1.10%

The ongoing charges are based on actual annualised expenses for the period ending 30 June 2026. Ongoing charges may vary from year to year.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another Fund.

For more information about Charges please see the Company's Prospectus.

Past performance

The past performance is calculated in GBP.

The Fund and the share class were launched in November 2025.

Insufficient data is available to provide a useful indication of past performance.

The Fund does not aim to track the performance of the benchmark.
