Objectives and investment policy

The Fund aims to provide a return from a combination of income and capital growth over the long term by investing in an actively managed portfolio of AAA to BBB- rated collateralised loan obligations (CLOs). The Fund is actively managed with reference to the J. P. Morgan US CLOIE BBB Index, which is broadly representative of the bonds in which it may invest. The Investment Manager (IM) has discretion to choose investments for the Fund with weightings different to the index or not in the index. The Fund will invest at least 80% of its Net Asset Value (NAV) in eligible CLOs of any maturity that are rated AAA to BBB- (or equivalent) at the time of purchase and either European or US CLOs. The Fund will seek to maximise BBB- to BBB+ rated (or equivalent) exposure where reasonably possible, while being permitted to tactically invest more senior tranches. In case securities in the portfolio are downgraded below a rating of BBB- (or equivalent), the IM will seek to sell the relevant securities as soon as reasonably possible, provided that it determines that it is in the best interests of investors. The Fund may invest up to 5% of its NAV in a single CLO security; 15% of its NAV in CLOs managed by an individual manager; Non-USD denominated securities hedged back to USD; 10% of its NAV in fixed rate securities that are hedged back to floating rate; The Fund will not invest more than 10% of its NAV in eligible collective investment schemes. Derivatives may be used for the purposes of hedging/risk reduction specifically interest and FX rates. For treasury management and/or defensive purposes, the Fund may invest in cash and Money Market Instruments. The Fund's major part of fx exposure is hedged to Base Currency. The Fund may hold up to 20% in its NAV in ancillary liquid assets as described in greater detail under paragraph 10.4 of the section entitled "Investment Restrictions". The IM develops portfolio management strategies as described in the Prospectus. As part of this process EU securitisation regulations are specifically considered. The Fund promotes environmental and social characteristics, as defined under Article 8 of SFDR.

– The Share Class of the Sub-Fund distributes income.

– This Sub-Fund may not be appropriate for short-term investment.

– The Share Class is denominated in MXN. The Sub-Fund is denominated in USD.

– Shareholders may subscribe/redeem units at the appropriate NAV per share provided an order request is received by the SICAV by the trade cut-off time 2.30pm (London time). Subscriptions/redemptions must meet the minimum amounts as set out in the supplement of the Sub-Fund. For more information on the Share Class of the Sub-Fund, please see the prospectus of the SICAV.

Risk and reward profile

Lower risk **Higher risk**

Typically lower rewards Typically higher rewards

1	2	**3**	4	5	6	7

This indicator is based on historical data and may not be a reliable indication of the future risk and reward profile of the Share Class.

The risk category shown is not guaranteed and may shift over time.

The lowest category (Category 1) does not mean 'risk free'.

The Share Class is rated 3 due to the nature of its investments and the frequency of price movement which include the following risks which may impact the value of the Share Class or expose it to losses.

– No capital protection: The value of your investment may go down as well as up and you may not get back the amount you invested.

– Liquidity risk: Lower liquidity means there are insufficient buyers or sellers to allow the Sub-Fund to sell or buy investments readily. Neither the Index provider nor the issuer make any representation or forecast on liquidity.

Active Management: Active management techniques that have worked well in normal market conditions could prove ineffective or negative for performance at other times.
Credit Risk: An issuer of a bond (or money market instrument) may become unable or unwilling to pay interest or repay capital. If this happens or the market perceives this may happen, the value of the bond will fall.
Collateralised Loan Obligations: Collateralised Loan Obligations (CLOs) are investments backed by pools of corporate loans. They carry risks from both the loans and the structure of the CLO. Risk varies by tranche, and credit ratings are not guarantees— even highly rated tranches can lose value in stressed markets. Key risks include liquidity, interest rate changes, credit defaults, and uncertainty around repayments.
CLO Prepayment, Extension or Call: Repayments from underlying loans are used to repay CLO securities after a specified period, but the timing is uncertain. Faster repayments can lead to early prepayment of securities trading above par, causing mark-to-market losses and forcing reinvestment at lower yields, reducing income. Slower repayments extend maturity, which can also result in losses. CLOs and callable securities may be redeemed early by issuers or equity holders, creating reinvestment challenges and potential income decline.
Dependence on Managers of CLOs: The performance of the sub-fund's investments in CLOs will depend in part upon the performance and operational effectiveness of the managers of the CLOs. The sub-fund will invest in CLOs which are subject to management and performance fees charged by the managers of the CLOs. These are in addition to the fees charged to the sub-fund.
Derivatives: Derivatives may be used with the aim of reducing risk or managing the portfolio more efficiently. However, this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.
Liquidity: Securities could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.
Counterparty and Operational Risks: Losses could be incurred if a counterparty became unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

For more information on the risks to the Sub-Fund, please see the supplement for the Sub-Fund and the prospectus of the SICAV, available on the product pages of www.janushenderson.com.

The Index is the intellectual property of the index provider. The Share Class is not sponsored or endorsed by the index provider. Please refer to the Sub-Fund's prospectus for full disclaimer.

Charges for this Share Class

The charges you pay are used to pay the costs of running the Sub-Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge: None*

Exit charge: None*

Charges taken from the Sub-Fund over a year

Ongoing charges: 0.49%

Charges taken from the Sub-Fund under certain specific conditions

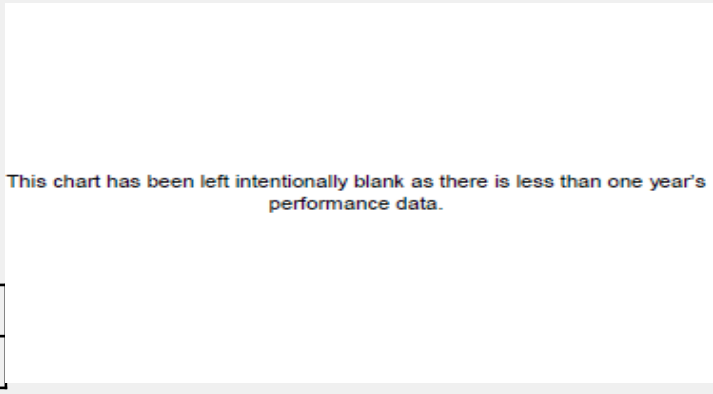

Performance fee: None

For more information about charges, please see the section "Fees and Expenses" of the Sub-Fund's prospectus and supplement, which is available a twww.jhetf.com.

Ongoing charges have not been based on an ex-post calculation as the Sub-Fund was launched less than one calendar year ago. Ongoing charges have accordingly been estimated based on the expected total of charges that will be taken from the assets of the Sub-Fund over the course of a year, in accordance with the Sub-Fund's supplement. It excludes portfolio transaction costs and taxes or duty charges for portfolio re-balancing, except in the case of an entry/exit charge paid by the Sub-Fund when buying or selling units in another collective investment undertaking if any.
