What is this product?

Type

Janus Henderson Global Multi-Strategy Fund is a sub-fund of Janus Henderson Fund, an open-ended investment company organised under the laws of the Grand Duchy of Luxembourg. Janus Henderson Fund qualifies as an undertaking for collective investment in transferable securities (UCITS).

Term

This investment has no maturity date. The Manufacturer has the right to terminate the product in a limited number of circumstances, as set out in the Prospectus.

Objectives

The Fund aims to provide a positive (absolute) return, regardless of market conditions, over any 12 month period. A positive return is not guaranteed over this or any other time period and, particularly over the shorter term, the Fund may experience periods of negative returns. Consequently, your capital is at risk. Performance target: To outperform the Euro Short Term Rate by 7% per annum, before the deduction of charges, over any 3 year period. The Fund invests in a global portfolio of assets including shares of companies, investment grade and non-investment grade bonds issued by governments and companies (including convertible bonds, contingent convertible bonds and distressed securities), currencies, and makes extensive use of derivatives (complex financial instruments), including total return swaps, to take both 'long' and 'short' positions in companies and bonds that the Investment Manager believes will either rise in value (long positions) or fall in value (short positions) meaning that the Fund may benefit from either scenario. The Fund may invest up to 20% of its net assets in contingent convertible bonds. The Fund may invest up to 10% of its net assets in special purpose acquisition companies and 10% in distressed debt securities. The Fund will hold a substantial proportion of its assets in cash and money market instruments as a result of holding derivatives or for asset allocation purposes. The Fund may also take long or short exposures to other asset classes such as commodities and may hold other funds (such as collective investment schemes and exchange traded funds). Allocations across asset classes will be made at the Investment Manager's discretion and the Fund need not be invested in all asset classes at any one time. It follows an unconstrained investment approach, with no regional or sector constraints. The Fund is actively managed and makes reference to the Euro Short Term Rate, as this forms the basis of the Fund's performance target and the level above which performance fees may be charged (if applicable). For currency hedged share classes, the rate that corresponds with the relevant share class currency is used as the basis of the performance comparison and for calculating performance fees. The Investment Manager has complete discretion to choose investments for the Fund and is not constrained by a benchmark. This share class accumulates income which is retained within the price of the share class. You can buy, sell or switch shares in the Fund on any dealing day, as defined in the Fund's Prospectus. The Fund's Depositary is BNP Paribas, Luxembourg Branch.

Intended Retail Investor

A typical investor will invest into this Fund to seek an absolute return through global markets and specifically through a global multi-strategy fund. Investors should ensure they have an informed understanding of the strategies and techniques employed by the Investment Manager, the risks of the Fund and that the synthetic risk indicator of the Fund is compatible with their own risk tolerance (please refer to the KIID). Investors in the Fund should plan to invest their money for at least 5 years. The Fund is not compatible for investors who can tolerate no loss of capital.

What are the risks and what could I get in return?

Risk Indicator

Lower Risk 1 **2** 3 4 5 6 7 Higher Risk

The risk indicator assumes that you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class.

This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the capacity of the PRIIPs manufacturer to pay you.

If the product currency differs from your home currency, the following applies: Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Details of all relevant risks can be found in the Fund's prospectus, available at www.janushenderson.com

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: 5 years

Example Investment: NOK 100,000

Scenarios		If you exit after 1 year	If you exit after 5 years
Minimum	**There is no minimum guaranteed return. You could lose some or all of your investment.**		
Stress	**What you might get back after costs**	79,400 NOK	75,440 NOK
	Average return each year	-20.60%	-5.48%
Unfavourable	**What you might get back after costs**	91,470 NOK	100,430 NOK
	Average return each year	-8.53%	0.09%
Moderate	**What you might get back after costs**	99,880 NOK	126,220 NOK
	Average return each year	-0.12%	4.77%
Favourable	**What you might get back after costs**	125,790 NOK	162,490 NOK
	Average return each year	25.79%	10.20%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment in the benchmark between April 2020 and April 2025.

The moderate scenario occurred for an investment in the benchmark between April 2019 and April 2024.

The favourable scenario occurred for an investment in the benchmark between September 2016 and September 2021.

What happens if Janus Henderson Investors Europe S.A. is unable to pay out?

You may face a financial loss should the Manufacturer or Depositary, BNP Paribas, Luxembourg Branch, default on their obligations. There is no compensation or guarantee scheme in place which may offset, all or any of, this loss.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.
We have assumed:
- In the first year, you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- NOK 100,000 is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	7,280 NOK	22,495 NOK
Annual cost impact (*)	7.3%	3.5% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 8.3% before costs and 4.8% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	5.00% is the maximum amount you pay when entering this investment and you could pay less. If you invest through a third-party the person selling you the product will inform you of the actual charge.	Up to 5,000 NOK
