- Industry since 2010

TIME TO REIMAGINE YOUR GLOBAL EQUITIES ALLOCATION

Markets are more complex than ever. With information overload, clarity to achieve investment objectives is needed. Janus Henderson's Discovering New Alpha (DNA) Fund cuts through the noise by leveraging deep and broad investment expertise to truly deliver.

Countering the noise and cutting through the clutter

True insight lies in identifying structural drivers rather than chasing headlines. Janus Henderson's deep research capabilities help investors focus on what's meaningful.

Addressing concentration risk and index bias

Traditional indexes reward past winners, leading to extreme concentration risk (eg. the Magnificent 7), and along with this valuation and diversification concerns. Our highly active approach aims to look beyond the index to uncover exciting emerging opportunities.

Investing in tomorrow's acronyms today

History shows that future leaders often start as overlooked challengers. Spotting them early is key to long-term success. Drawing on experience in identifying structural shifts, Janus Henderson's authority in navigating change means we're already identifying the companies that could define the next wave.

WHY DNA?

The DNA Fund aims to deliver a truly differentiated approach to global equity investing.

ADDRESSING GLOBAL CHALLENGES WITH TRANSFORMATIONAL THEMES

Our in-depth thematic expertise aims to provide a strategic overlay to identify the companies that emerge from 7 long-term growth opportunity sets and themes

Smarter automation
Automating the real world

Mobilty
Redefining jouneys

Lifestyle 2.0
Evolution of how we work and play

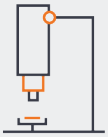

Sovereignty
Relocalisation and security

Longevity
Reimagining demographics

Biotech
Addressing unmet medical needs

Net zero 2.0
Resiliency in energy and sustainability

WHAT WILL BE DRIVING ALPHA TOMORROW? – TRANSFORMATIONAL THEMES

Our DNA Fund aligns with next-generation themes drawn from our investment desks to identify companies positioned to benefit from long-term structural shifts in the global economy.

This thematic framework serves as a strategic guide rather than a constraint, leveraging thematic insights to prioritise and shape the search for emerging opportunities.

> RAPID IMPROVEMENTS IN SCIENTIFIC PRODUCTIVITY

FDA Drug Approvals[1]

Over **150%** increase in FDA drug approvals

2006-2010 vs 2021-2025

Blockbuster drug sales[2]

Blockbuster drug sales are

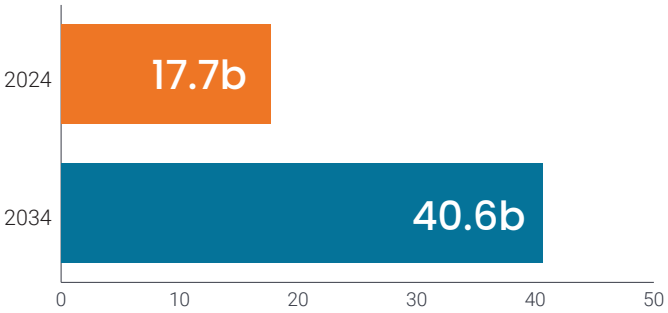

75 times higher

vs 2000

> EMERGING TRENDS BECOME ENDURING VALUE

Global IoT devices expected to reach 40.6b by 2034, up from 17.7b in 2024.

Internet of things (IoT)[3]

As smart technologies become embedded across industries, organisations must evolve to harness real-time data, streamline operations, and deliver intelligent customer experiences. This transformation is not just technological—it's strategic, unlocking enduring value and long-term advantage.

> SOLVING FOR AN AGEING POPULATION

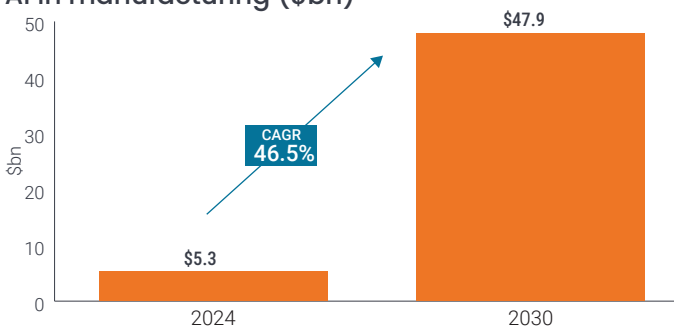

Between 2015 and 2050, the proportion of the world's population **over 60 years** will nearly double from **12% to 22%**[4]

On average, those over the age of **65** spend **3x** more on healthcare[5].

By **2025**, AI is expected to help close care gaps for over **4.5 billion** people lacking access to essential health services worldwide[6].

> AI SHAPING HOW WE LIVE, WORK AND PLAY

AI in manufacturing ($bn)[7]

AI reasoning requires more power

100x Increase in compute

As reasoning models elaborate, they require more tokens—driving up compute demands.

48k MWH Power of training

It took **48,600** MWH to train ChatGPT's reasoning model, enough to power **4,500** American homes for a year[8].

Additional Fund Information

Investment objective & policy

The Fund aims to provide capital growth over the long term. Performance target: To outperform the MSCI ACWI Index, after the deduction of charges, over any 5-year period. The Fund invests at least 80% of its net assets in equities and equity-related instruments of companies worldwide, including up to 20% of its net assets in emerging markets. The Investment Manager seeks to invest in companies that it believes may offer strong growth potential because their products and services are considered well positioned to benefit from addressing global challenges, including population growth, ageing population, resource constraints, and climate-related developments. The Fund may invest in companies of any size, in any country and in any industry, but may have a bias towards smaller capitalisation companies. Equities may include China A-Shares, directly through the Stock Connect Programmes and other eligible exchanges or indirectly through derivative instruments. Exposure to China-A Shares will not be more than 20% of the Fund's net asset value. Equity-related instruments may include depositary receipts. The Fund may also invest in other assets including Collective Investment Schemes (including those managed by Janus Henderson), cash and money market instruments. The Investment Manager may use derivatives (complex financial instruments) to reduce risk or to manage the Fund more efficiently.

The Fund is actively managed with reference to the MSCI ACWI Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the Fund's performance target. The Investment Manager has discretion to choose investments for the Fund with weightings different to the index or not in the index.

Fund specific risks

Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result. Shares of small and mid-size companies can be more volatile than shares of larger companies, and at times it may be difficult to value or to sell shares at desired times and prices, increasing the risk of losses. Derivatives may be used with the aim of reducing risk or managing the portfolio more efficiently. However, this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations. If the Fund holds assets in currencies other than the base currency of the Fund, or you invest in a share/unit class of a different currency to the Fund (unless hedged, i.e. seeks to mitigate exchange rate movements between the share/unit class currency and the base currency of the Fund), the value of your investment may be impacted by changes in exchange rates. When the Fund, or a share/unit class, seeks to mitigate exchange rate movements of a currency relative to the base currency (hedge), the hedging strategy itself may positively or negatively impact the value of the Fund due to differences in short-term interest rates between the currencies. Securities could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses. Losses could be incurred if a counterparty became unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider. This fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this fund.

Important Information

This product integrates ESG but does not pursue a sustainable investment strategy or have a sustainable investment objective or otherwise take ESG factors into account in a binding manner. ESG integration is the practice of incorporating material environmental, social and governance (ESG) information or insights in a non-binding manner alongside traditional measures into the investment decision process to improve long-term financial outcomes of portfolios. ESG related research is one of many factors considered within the investment process and in this material we seek to show why it is financially relevant.
