

# FLEXIBLE INCOME FUND

## Flexible, research-driven and risk-aware

We believe our research-driven investment process, diversified portfolio construction and robust risk management can drive consistent risk-adjusted performance, with excess returns generated primarily through sector and security decisions. Our collaborative investment teams utilise our broad investment flexibility across the investment cycle in an effort to capitalise on attractive opportunities and provide the downside risk management clients expect from their core fixed income portfolio.

### Why invest in the fund

#### Research-driven investment process

Collaboration is the foundation of our investment process, through which we partner with our equity and multi-asset teams to identify attractive opportunities across fixed income sectors by analysing fundamentals, technicals and valuations.

#### Flexible fixed income allocation

Our team draws on a breadth of global resources to drive asset allocation and invest with conviction in an effort to deliver excess returns and provide the downside risk management expected from a core fixed income allocation.

#### Robust risk management and portfolio construction

Our transparent investment process and integrated risk management, which is enhanced by quantitative research and proprietary technology, aims to construct resilient portfolios from a diverse investment universe.

## Ability to generate return from multiple sources

### Expected sources of excess return

Note: There is no assurance the stated objectives will be met.

## Portfolio management
