Additional fund information

Projected yields are based on numerous assumptions, details of which are available upon request. There is no guarantee the yield stated will be achieved. Tax assumptions and reliefs depend upon an investor's particular circumstances and may be subject to change. Janus Henderson does not currently levy a redemption charge. As of 31st May 2026, Rhys Petheram, CFA, no longer manages this fund. Please note: due to rounding the figures in the holdings breakdowns may not add up to 100%. This is an Irish collective asset-management vehicle regulated by the Central Bank of Ireland. Note that any differences among portfolio securities currencies, share class currencies and costs to be paid or represented in currencies other than your home currency will expose you to currency risk. Costs and returns may increase or decrease as a result of currency and exchange rate fluctuations. To obtain our prospectus and any additional information please visit our website on: www.janushenderson.com. Investment into the fund will acquire units/shares of the fund itself and not the underlying assets owned by the fund. Cash balances and exposures are based on settled and unsettled trades as at the reporting date.

Investment policy

The Fund will seek to achieve its investment objective using an optimisation strategy whereby the Fund will invest primarily in a portfolio of fixed rate, USD denominated, Mexican sovereign bonds maturing within 10 -30 years (the "Sovereign Bonds"). The resulting portfolio will, as far as practicable, reflect the risk and return profile of the Index.

Investment strategy

The optimisation strategy uses industry standard tools (i.e. non-proprietary tools that are readily available to all investment funds employing a sampling strategy, such as the Bloomberg Portfolio and Risk Analytics Terminal (PORT)) to select a portfolio with similar risk and return characteristics to the Index in order to generate similar returns to the Index. While it is intended that the Fund's investments will comprise issues maturing in 10 to 30 years, issues with longer or shorter maturities may be held until such time as it is possible and practicable (in the Investment Manager's view) to liquidate the position taking account of the interests of Shareholders. As further described in the 'Investment Techniques and Instruments' section in the Prospectus, the Fund will also invest in US government bonds and FDIs for efficient portfolio management purposes. The FDIs in which the Fund may invest are OTC Total Return Swaps and futures as more particularly described in the Prospectus. The securities and FDIs in which the Fund invests will be primarily listed or traded on the stock exchanges and regulated markets set out in Schedule 1 of the Prospectus, although the Fund may also invest in unlisted securities in accordance with the limits set out in the UCITS Regulations.

Fund specific risks

An issuer of a bond (or money market instrument) may become unable or unwilling to pay interest or repay capital. If this happens or the market perceives this may happen, the value of the bond will fall. When interest rates rise (or fall), the prices of different securities will be affected differently. In particular, bond values generally fall when interest rates rise (or are expected to rise). This risk is typically greater the longer the maturity of a bond investment. Emerging markets expose investors to higher volatility and greater risk of loss than developed markets; they are susceptible to adverse political and economic events, and may be less well regulated with less robust custody and settlement procedures. The performance of the Sub-Fund is not expected to precisely match the performance of the index at all times and the deduction of fees and expenses means the Sub-Fund might deliver a lower total return than the index. High exposure to a particular country or geographical region carries a higher level of risk than a more broadly diversified portfolio. Derivatives may be used with the aim of reducing risk or managing the portfolio more efficiently. However, this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations. Securities could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses. Losses could be incurred if a counterparty became unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

Source for fund ratings/awards

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 3 out of 7, which is a medium-low risk class. The risk indicator assumes you keep the product for 5 years. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

Glossary

Duration
Duration can measure how long it takes (in years) for an investor to be repaid a bond's price by the bond's total cash flows. Duration can also measure the sensitivity of a bond's or fixed-income portfolio's price to changes in interest rates. The longer a bond's duration, the higher its sensitivity to changes in interest rates, and vice versa. 'Going short duration' refers to reducing the average duration of a portfolio, while 'going long duration' refers to extending a portfolio's average duration.

Tracking error
This measures how far a portfolio's actual performance differs from its benchmark index. The lower the number, the more closely it resembles the index.

WAM (Weighted Average Maturity)
The average time remaining until the maturity of assets in a portfolio.

Yield to maturity
Total annualised return anticipated on a bond if held until it matures, assuming all payments are made on time and reinvested at the same rate.

Janus Henderson
INVESTORS

This product integrates ESG but does not pursue a sustainable investment strategy or have a sustainable investment objective or otherwise take ESG factors into account in a binding manner. ESG integration is the practice of incorporating material environmental, social and governance (ESG) information or insights in a non-binding manner alongside traditional measures into the investment decision process to improve long-term financial outcomes of portfolios. ESG related research is one of many factors considered within the investment process and in this material we seek to show why it is financially relevant.
Not for onward distribution. This is a marketing communication. It is not investment advice and is not an offer to sell or solicitation of an offer to buy any investment. This document is for Professional Clients (as defined by the FCA or MiFID Rules) and Qualified Investors only and should not be relied upon by any other persons. It is not for persons who are resident in the United States, Canada or any province or territory thereof. You should satisfy yourself as to the full observance of the laws of any country that might be relevant to the subscription, purchase, holding, exchange, redemption or disposal of any investment. Janus Henderson Investors has not considered the suitability of any investment against your individual needs and risk tolerance.

Janus Henderson ICAV is an umbrella Irish collective asset-management vehicle incorporated in Ireland, authorised and regulated by the Central Bank of Ireland. The ETFs referenced in this document (each a "Fund") are open-ended investment sub-funds of Janus Henderson ICAV, which has variable

capital, having segregated liability between its funds, and is organised under the laws of Ireland. No provider of information presented here, including index and ratings information, is liable for damages or losses arising from use of their information or for any losses relating to the accuracy, or completeness of such information.
